Limited Modular Approval. Power Output listed is conducted. The limited modular transmitter and its antenna must be located at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. OEM integrators and end-users must be provided with transmitter operation conditions for satisfying RF exposure compliance. The limited modular transmitter uses an electronic display of the FCC identification number; the information must be readily accessible on the device in which it is installed. The FCC ID can be read from the UART of the device described in the users manual. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)".
